

The Fergus County Health Department (FCHD) provides our communities with protection from diseases through immunization services. Vaccines help prevent diseases that used to be the top killer of children in this country. Maintaining high rates of childhood immunizations protects not only vaccinated children, but also those too young or too ill to have completed their full series of immunizations. A reduction in immunization rates inevitably results in an increase in disease. Therefore, immunizations are crucial to the health and safety of the community at large. FCHD conducts daycare immunization record reviews to ensure compliance with the State of Montana immunization laws. FCHD offers traveling and school based immunization clinics for children and adults.

Immunizations are available at the Fergus County Health Department Monday thru Friday 9 am to 4:30 pm. Appointments are suggested (406- 535-7433) but not required. Please note that the nurse's schedule is subject to change.

NO CHILD IS DENIED VACCINES DUE TO INABILITY TO PAY!

FCHD participates in the Vaccine for Children program offering federally funded vaccines for children age 0 - 18 for routine childhood vaccines.

2021 - 2022 Influenza Vaccinations:

- [Adult Flu Form](#)
- [Child Flu Form](#) (6 mos to 18 years of age)
- [Influenza Vaccine Information Sheet](#)

Travel Vaccines - our office can assist you with determining vaccination needs for out of country travel.

Immunization Laws

Montana has enacted laws that require children to have certain immunizations before entering school or day care.

- [MT Immunization requirements for school](#) - In order to be enrolled in school, children must have the required vaccines by age.
- [MT Immunization requirements for daycare](#) - Immunization requirements for day care attendance are based on the child's age and generally follow the recommended childhood schedule.
